I'm a creative and motivated full stack engineer with a passion for building visually appealing and user-friendly web applications. Proficient in JavaScript, React, Next.js, and MongoDB. Strong ability to work in an agile and collaborative environment.

WORK EXPERIENCE

Software Developer

Jan 2023 - Present

Freelance

Remote

Collaborated closely with clients to understand the specific needs, goals, and vision for the web development by constantly engaging with them, testing the usability and troubleshooting by looking for solutions that will result in a fully satisfied client feedback. The works I did will always involve the newest and most reliable technology stack, as I am always continuously learning.

Professional Coding Teacher

Jun 2022 - Jul 2023

Pang Miao Miao

China

Worked in an after-school class for kids in primary school. Taught basic coding skills and concepts for a year in English to Chinese students.

International Trade Consultant

Oct 2021 - Mar 2022

Qingdao Runshengyuan Container

China

Consulted an international deal between two companies from different countries, achieved common grounds and rebuilt a wonderful new relationship.

EDUCATION

Software Engineering

Jul 2019 - Jul 2023

Shandong University of Science and Technology

Graduated from a class with an international environment where I learned about the fundamentals and current modern topics of Software Engineering.

PROJECTS

Web Portfolio

Designed with figma and developed using ReactJs. I used technologies such as Node, JavaScript and TailwindCSS. The website was deployed using Netlify through GitHub. It was a personal project for me to use the most current and top of the line technologies.

Human Resource Manager

A full-stack project I developed using the Spring MVC framework. The back-end is written in Java, while using pure CSS for a user-friendly front-end. Executes all the CRUD functions and stores it in a MySQL database. I also used Spring Security to make the high-performance web app more secure and reliable since it is protected by user login.

BVKE Ecommerce

Designed with Figma and developed in WordPress. I took responsibility as the only developer for the client's website. With continuous consultation, the number one priority was to achieve a 100% satisfaction rate in the design and functionality. The front end design was a modern, innovative look for a brownie shop and was SEO tested.

SKILLS

Soft Skills: Communication Skills, Continuous Learning, Teamwork, Adaptability, Problem-solving, Time Management, Creativity, Resilience, Analytical

Tech Stacks: React, Next.js, TailwindCSS, Tailwind, PHP, MySQL, JavaScript, Java, Python, C, C++, HTML, CSS, Node.js
