## EXPERIENCE

### **Freelance**— *Develop e-commerce and portfolios*

Collaborated closely with clients to understand their specific needs, goals, and vision for their projects by actively engaging with them. From conceptualization to deployment, I've been involved in every stage of the software development lifecycle.

### **Consulting**— *International Trade*

Consulted an international deal between two companies from different countries, achieved common grounds and rebuilt their relationship.

## PROJECTS

### **Web Portfolio** — *A personal portfolio that showcases my skills and projects* [kelvinsukhiraja.netlify.app](#)

Designed with figma and developed using ReactJs. I used technologies such as Node, JavaScript and TailwindCSS. I then deployed the website using Netlify through GitHub.

### **Human Resource Manager** — *A management website created using the Spring MVC* [GitHub](#)

A full-stack project I developed using the Spring MVC framework. The back-end is written in Java, while using pure CSS for a user-friendly front-end. Executes all the CRUD functions and stores it in a MySQL database. I also used Spring Security to make the web app more secure and reliable since it is protected by user login.

## EDUCATION

### **Shandong University of Science and Technology** China, Qingdao— *Software Engineering*

Graduating from an international class, I learned Software Engineering fundamentals and modern topics needed for my career.

## SKILLS

### **Programming:**

- Java
- JavaScript
- C & C++
- Python

### **Web & Database:**

- React JS
- HTML
- CSS
- TailwindCSS
- Sass
- PHP
- MySQL
- phpMyAdmin

### **Framework:**

- Spring MVC
- Node
- Android Development

### **Design:**

- Figma
- Adobe Illustrator

## AWARDS

Achieved A\* in English for *The International General Certificate of Secondary Education* (IGCSE)

Scholarship from both the SDUST and the Qingdao Municipal Government

## LANGUAGES

English | Bahasa Indonesia
