PROJECTS

Web Portfolio — *A personal portfolio that showcases my skills and projects* [kelvinsukhiraja.netlify.app](#)

Designed with figma and developed using ReactJs. I used technologies such as Node, JavaScript and TailwindCSS. I then deployed the website using Netlify through GitHub.

Human Resource Manager — *A management website created using the Spring MVC* [GitHub](#)

A full-stack project I developed using the Spring MVC framework. The back-end is written in Java, while using pure CSS for a user-friendly front-end. Executes all the CRUD functions and stores it in a MySQL database. I also used Spring Security to make the web app more secure and reliable since it is protected by user login.

University's Web Parsing — *Android application* [Github](#)

Inspired by a problem I had using the over complicated University website, I developed an android app using Java in Android Studio to scrape the University's website and display the parsed grade tables and current campus news.

EDUCATION

Shandong University of Science and Technology
China, Qingdao— *Software Engineering*

2019 - Ongoing

Currently enrolled in an international class with people from all over the world. I learned all the fundamentals and current topics in Software Engineering here with theory and practices done in groups.

Matana University
Indonesia— *Computer Science College*

2018 - 2019

A 1 year course dedicated for a Computer Science Degree.

SKILLS

Programming:

- Java
- JavaScript
- C & C++
- Python

Web & Database:

- React JS
- HTML
- CSS
- TailwindCSS
- Sass
- PHP
- MySQL
- phpMyAdmin

Framework:

- Spring MVC
- Node
- Android Development

Design:

- Figma
- Adobe Illustrator

AWARDS

Achieved A* in English for *The International General Certificate of Secondary Education* (IGCSE)

Scholarship from both the SDUST and the Qingdao Municipal Government

LANGUAGES

English | Bahasa Indonesia
