EXPERIENCE

Consulting— *International Trade*

Consulted in an international deal between two companies from different countries, achieved common grounds and rebuilt their relationship.

PROJECTS

Web Portfolio — *A personal portfolio that showcases my skills and projects* [kelvinsukhiraja.netlify.app](#)

Designed with figma and developed using ReactJs. I used technologies such as Node, JavaScript and TailwindCSS. I then deployed the website using Netlify through GitHub.

Human Resource Manager — *A management website created using the Spring MVC* [Github](#)

A full-stack project I developed using the Spring MVC framework. The back-end is written in Java, while using pure CSS for a user-friendly front-end. Executes all the CRUD functions and stores it in a MySQL database. I also used Spring Security to make the web app more secure and reliable since it is protected by user login.

University's Web Parsing — *Android application* [Github](#)

Developed an android app using Java in Android Studio to scrape the University's website and display the parsed data.

EDUCATION

Shandong University of Science and Technology China, Qingdao— *Software Engineering*

2019 - 2023

Currently enrolled in an international class with people from all over the world. I learned all the fundamentals and current topics in Software Engineering here with theory and practices done in groups.

SKILLS

Programming:

- Java
- JavaScript
- C & C++
- Python

Web & Database:

- React JS
- HTML
- CSS
- TailwindCSS
- Sass
- PHP
- MySQL
- phpMyAdmin

Framework:

- Spring MVC
- Node
- Android Development

Design:

- Figma
- Adobe Illustrator

AWARDS

Achieved A* in English for *The International General Certificate of Secondary Education* (IGCSE)

Scholarship from both the SDUST and the Qingdao Municipal Government

LANGUAGES

English | Bahasa Indonesia
